

HAMZA SAEED

Information Technology Student | Frontend Developer

Gujranwala, Pakistan | +92 328 0486544 | itshamza449@gmail.com

GitHub | LinkedIn | Portfolio

SUMMARY

Information Technology student focused on frontend development, with hands-on practice building responsive web interfaces using HTML, CSS, and JavaScript. Experienced with API integration using `fetch()` and `async/await` through personal projects. Seeking a frontend development internship or entry-level opportunity to continue learning and contribute.

EDUCATION

BS Information Technology — University of the Punjab, Lahore

Government Islamia College, Gujranwala (affiliated with University of the Punjab)

Expected Graduation: 2027 | 6 semesters completed | CGPA: 3.10 (after 5 semesters)

TECHNICAL SKILLS

Core Technologies: HTML, CSS, JavaScript, Bootstrap, Tailwind CSS

Web & Concepts: Responsive Web Design, APIs, Async/Await

Tools: Git, GitHub, Linux, VS Code

PROJECTS

Personal Portfolio Website | GitHub | Live Demo

- Built a responsive personal portfolio with HTML, CSS, and JavaScript, featuring hero, about, skills, projects, and contact sections.
- Implemented accessible mobile navigation with a collapsible sidebar and scroll-based section highlighting using the Intersection Observer API.

Amazon E-commerce Clone | GitHub | Live Demo

- Developed a multi-page, Amazon-inspired e-commerce interface covering home, checkout, orders, and order-tracking pages with HTML, CSS, and JavaScript.
- Built responsive navigation, product cards, and search interface layouts adapted for desktop, tablet, and mobile.

YouTube Clone | GitHub | Live Demo

- Recreated the YouTube homepage layout with HTML and CSS, using Flexbox and CSS Grid for a responsive video grid and sidebar navigation.
- Implemented hover effects and responsive layout behavior across screen sizes.

Currency Converter | GitHub | Live Demo

- Built a currency converter that fetches exchange-rate data from a public API using `fetch()` and `async/await`.
- Updated conversion results and country flags dynamically through DOM manipulation.

Random Password Generator | GitHub | Live Demo

- Created a vanilla JavaScript password generator that produces two 15-character passwords.
- Used DOM manipulation, event listeners, and `Math.random()` to generate password values.
